Diagnostic interventions; increased resources and timing idealizations are explicitly recorded
Real captured cold token: unchanged full graph, addresses and native bytes
Up-local baseline
MC + paid staging: 16 slots
Optimistic native command gaps
Collection: one tick (nonphysical)
Gateway output: 4096 B/ns
Same-resource native round-robin
Return reservations: 1024 atoms
451.676 (+0.000%)
451.852 (-0.039%)
347.129 (+23.146%)
451.611 (+0.014%)
451.676 (+0.000%)
1533.412 (-239.494%)
451.676 (+0.000%)
Fixed baseline mapping: 344.148 µs Gateway payload bound
